

# A BUILDING BOOM

Such as Wheeling never Experienced before in her History

NOW AT ITS HEIGHT IN THIS CITY.

More and Finer Houses going up than Ever seen in one Season.

HUNDREDS OF THOUSANDS SPENT

For new Residences, new Banks, new Factories and new Stores.—A new Era marked by the Character of the Costly Structures now being Erected in all Parts of town and in the Suburbs.—A List of the Principal Improvements.

**B**UILDING operations were never so brisk in Wheeling as they are at this time. The class of buildings being erected was never of such a high grade, and there never were so many houses under contract or in course of construction as now. All those in any way connected with the building trades, from the architects to the mortar mixers and cellar diggers are pushed with work. Architects are unable to get all the assistants needed and carpenters and brick and stone masons are in demand everywhere.

This can hardly be attributed to the long strike of last year, which held back all building operations, though the inability to build last year has helped this year's boom.

Below will be found a list containing many of the new buildings now erecting or completed this season. Formidable as it may seem, there is no doubt that many buildings have been overlooked in the search.

## SOME OF THE BUILDINGS.

Work on the Jewish synagogue is progressing rapidly, and the brick work on the first story is well up. The building is expected to cost about \$17,000, and will probably be finished before the end of the year. The Wheeling Mining and Manufacturing Company is doing the brick work, Klieves, Kraft & Co. the carpenter and mill work. Thomas W. Jackson the stone work, and Carnegie, Phipps & Co., of Pittsburgh, are furnishing the structural iron.

The annex to the Fourth ward public school has not made much headway. The foundation pits are down to the full depth, and piles have been driven to hold back the quicksand. The whole job is in the hands of the Wheeling Mining and Manufacturing Company, and the building complete will cost very nearly \$25,000. It is hard to say at this time when the building will be completed and ready for occupancy. The old building is also to be remodeled by taking off the old mansard roof and cutting it down to three stories, and putting in a set of straight stairs at each end in place of the very dangerous winding stairs now in use.

Mr. Harry Robinson has the plans prepared for a fine, new three-story residence to be built on North Main street at a cost of about \$5,000. The contract has not been let for the work.

August Helmbright is building a three-story brick dwelling and store room at Thirty-Sixth and Jacob streets, to be occupied by himself. August Fischer has the contract for the whole building, and has sub-let the brick work to the Wheeling Mining & Manufacturing Company, and the stone work to Rosenberg. The building is now completed as far as the second story. It will cost about \$8,000.

## NORTH MAIN STREET HOUSE.

George Eckhart has let the contracts for a dwelling on North Main street, to cost \$7,500. M. F. Giesey drew the plans. J. C. Emmerth has the stone work, the Wheeling Mining & Manufacturing Company the brick work and Wood Brothers the carpenter and mill work. It will be a very neat residence and will be one of the finest in that part of town.

Mrs. William Hastings is making improvements on her house on Eoff street between Twenty-third and Twenty-fourth streets, which will cost about \$1,000.

Beltz, Flading & Co. have the contract for building an \$800 frame residence for Owen Reed on Twenty-seventh street.

Shaeffer & Driehorst are building a new \$15,000 business house at the corner of Main street and Alley 10. Max Laing has the contract for the stone work and has the foundations almost completed. The Wheeling Mining & Manufacturing Company has the brick work and Louis Hartong & Son the carpenter work. J. A. Holliday & Son will furnish the lumber and do the mill work. The building will be five stories high and will be built of pressed brick, with ornamental stone trimmings. It will be one of the best houses on the "street," and is expected to be ready for occupancy about November 1.

Joseph Hedges is building a fine double brick residence on North Main street. It will cost in the neighborhood of \$10,000, and will be one of the ornaments of that very well appointed section. P. J. Gilligan has the stone work, the Wheeling Mining & Manufacturing Company the brick work and Klieves, Kraft & Co. the carpenter and mill work.

F. Schenk & Sons have just completed an addition to their pork packing establishment at Fulton at a cost of \$6,000. The Wheeling Mining & Manufacturing Co. has the contract.

## HOFFMAN'S TANNERY.

The addition to the Hoffman tannery is one of the largest improvements going up in town this season. It will be three stories high and will be finished very nicely on the outside. Max Laing has the contract for the stone work, all of which is dressed. Bodley Bros. the brick work and Louis Hartong the carpenter work. The addition is expected to cost about \$10,000, exclusive of machinery and appliances.

Alex. T. Young, the Sixteenth street druggist, is building a fine pressed brick double residence on Fourteenth street. T. W. Jackson is doing the stone work, Scott Fair the carpenter work, and the Wheeling Mining and Manufacturing Co. the brick work. The house will be complete in all its details, and one of the best in that section of the city. It will cost between \$9,000 and \$10,000.

M. F. Giesey has prepared plans for a fine frame dwelling for Jack Glasscock on the island. The contract has not been let yet, but the plans call for a

very cozy and comfortable house, with enough artistic work on the outside to present a very good appearance.

Christian Steinmetz is building an addition to one of his tenements on Seventeenth street that will cost \$2,000.

Henderson, McCann, is making improvements on his North Main street property that will cost \$3,500. T. W. Jackson is doing the stone work, Beltz, Flading & Co. the carpenter work, and the Wheeling Mining and Manufacturing Company the brick work. This improvement is quite extensive, and means almost rebuilding the house.

T. T. Hutchison is tearing down the old building at the corner of Main street and Alley 9, preparatory to putting up a new four story building on the site. The new house will have a front built of pressed brick and plate glass. The contract has been let to the Wheeling Mining and Manufacturing Company, T. W. Jackson and Beltz, Flading & Co.

Dan L. Prager is building for himself, a new residence out the pike. It will cost about \$3,000, and the whole job has been let to Klieves, Kraft & Co., who have sublet the stone work to T. W. Jackson, and the brick work to Carl Hamilton.

## FINEST IN THE COUNTY.

A new residence is to be built for B. W. Peterson at Woodsdale, out the pike. It is a modern country villa with colonial treatment and promises to be the finest home in Ohio county. It will have twenty rooms, and will cost about \$18,000. O'Neal & Funk have the contract and have sub-let the brick work to contractor Ferguson, and the stone work to T. W. Jackson. The house will occupy a commanding position and will be amidst beautiful surroundings that will add to the effectiveness of the structure.

Mrs. Samuel Laughlin has purchased a lot next to Mr. Peterson and has contracted for a \$10,000 house to be built upon it. The house is to be made from plans prepared for a house for Alex. Laughlin and built in Cleveland, and will be a very artistic affair. The work has all been let to Cleveland contractors.

The plans have been furnished for the rearrangement of the property of the Wheeling Title and Trust Company on Market street. The work will cost about \$3,000 and the contract has been let entire to the Wheeling Mining and Manufacturing Company. The improvement includes an artistic plate glass front and a complete rearrangement of the interior of the building. A stone vault of the most modern design is included in the plan.

One of the most stately improvements which Wheeling will have this year is the building of the City Bank of Wheeling, now being built at the corner of Alley 9 and Market street. It will be a six-story granite structure. P. Rinehalter & Co., of Philadelphia, are doing the granite work and the remainder of the job is being done by the day under the superintendence of Charles P. Hamilton. The building will be modern in all respects. The first story will be devoted to the uses of the bank and the remainder will be fitted up for offices. The exterior will be very ornamental and it will add greatly to the appearance of that part of Market street.

## PRESSED BRICK AND STONE.

Two new houses are being erected on the lot formerly occupied by the List homestead, on North Main street. Mr. Henry K. List is building these houses with day labor. One is for John K. List and the other for Mrs. Elward Hazlett. They will be of pressed brick with cut stone trimmings, two stories high, with steep roofs.

Funk & O'Neal are building a very handsome modern frame house, colonial treatment, for J. R. McCortney, on South Front street, on the island. The house will contain about fourteen rooms and will be quite ornamental.

A pure English Queen Anne house for Henry M. Russell is to be built on South Front street, Island. The house will be a beauty, and Mr. Russell has selected a very pretty location. The contract has not been let.

Nelson Noble is making some extensive repairs and alterations on his house in Virginia street, Island. Kootz, of New Martinsville, has the contract for doing Mr. Noble's work.

Plans have been prepared for a new building for Lou Swabacker, on Market street, at the place now occupied by him. It will be a very neat three story pressed brick and stone structure.

Mrs. S. L. Hildreth has had plans prepared for two pressed brick and stone residences on Chapline street just below Twelfth. The contracts for the work have been let as follows: stone work, Gilligan; brick work, Hamilton; carpenter work, Klieves, Kraft & Co., and plastering, Stoetzer & Murphy.

## A NEW RECTORY.

The trustees of St. Matthew's church have decided to build a rectory on the vacant ground just north of the church, and have had plans drawn for the building, which is to be of the same general style as the church. It will be a very cozy house and will serve to set off the church much better than the vacant lot.

Dr. John Frissell has plans prepared for a fine new three-story pressed brick and stone house on Fourteenth street. The contract has not been let.

William P. Heiskell has contracted with O'Neal & Funk for a pure English Queen Anne house at Woodsdale, out the pike. The house will be covered entirely with shingles. The effects produced in the drawings are very picturesque, and the house will be one of the models of that new and very fashionable suburb.

Gibson Lamb has plans in hand for a large country villa at Woodsdale. It is a sort of composite structure and will be very pretty.

A new Episcopal chapel is to be built at Elm Grove. It will be of brick and wood, and Gothic in its general style. It will cost about \$4,000 and will be a very pretty structure.

Plans have been prepared and work will soon begin on the further improvements of the Public Library building. The work includes a new entrance on Fourteenth street and the remodeling of the rear portion of the building.

Plans have been prepared for two new railroad stations at Glendale, one for the Ohio River road and the other for the Baltimore & Ohio. They will both be very tasteful and of modern and approved design.

## NEW SALOON FRONT.

The Pabst Brewing Company, of Milwaukee, through its local representative, is having the building formerly occupied by Jacob Nunge, located on Market street between Eleventh and Twelfth, remodeled. A fine plate glass front will be put in, and the interior will be made to correspond with the improved appearance of the front.

While the prospects are remote of the Peabody Insurance Company's erecting the building for which plans were made some time ago on their lot on Market street, there will in all probability be a building of some sort erected there. The company is only holding back because of the expense contemplated in the plans. A gentleman, speaking to an INTELLIGENCER reporter yesterday, said that if the Insurance Company did not intend to build and would sell him the ground at any reasonable figure, he would insure the erection of the building contemplated in the original plans. He said he knew of a man, not at this

time in Wheeling, who has the money needed, and who feels well enough satisfied with the prospects of the city to expend it on such a building.

The following list of jobs have been built or are now in the hands of the Woods Bros. Planing Mill Company:

A two-story brick store room and dwelling for George Carl at the corner of Thirty-ninth and Jacob streets costing \$4,000; a two-story frame dwelling for Emmett on South Huron street, Island, cost, \$3,000; a two-story frame dwelling for Samuel F. Paris on North Front street, Island, cost, \$2,500; stables, warehouses, offices, etc., for the Pabst Brewing Company on Thirty-third street, cost, \$5,000; a two-story frame house for Miss Lucy Kyle on Virginia street, Island, quite a nice building, cost, \$4,000; two two-story frame houses for Thomas Johns on North Huron street, Island, very nicely finished, cost, \$7,000; a dwelling with store room for Lloyd Biddle on South Jacob street, two-story brick, trimmed with stone, cost, \$5,000; two-story frame building for Hon. John A. Howard on South Eoff street, handsome, ornamental design, cost, \$3,500; warehouses for J. H. Locke & Co. Main street, rear of shoe store, cost \$500; remodeling the residence of George Horth on South Jacob street, cost \$2,000; tobacco ware house for Henry Wheeler on South Chapline street, very heavy timbering, substantial building, cost \$2,000; remodeling store room and putting in new front for Dora L. Hornbrook, (Bon Ton store), cost \$2,000; a two-story frame house for August Knoke on South Jacob street, cost \$2,000; three-story brick dwelling for Thomas F. Porter on South Main street, cost \$3,000; a dwelling and store room for Samuel F. Ruff on Chapline street, above Twenty-second, pressed brick front, with stone ornaments, neat modern building, cost \$4,000; two-story frame dwelling for Quinton C. McClelland on Virginia street, Island, cost \$2,500; modern two-story frame dwelling, ornamental design, on North Front street, cost \$4,000.

## LOTS OF COMFORTABLE RESIDENCES.

Louis Hartong has built a \$2,000 two-story frame house for James Bedillion at Elm Grove. It was completed about two weeks ago. J. A. Holliday furnished the lumber and mill work.

M. L. Eitzler has completed a \$2,000 two-story frame dwelling for W. Murphy on Zane street on the island.

William Frieze has completed three good new dwellings this season. One for James Friesmuth on Fifteenth street, costing \$3,500; one for William Dimmey at the corner of Eighteenth and Woods streets, costing \$4,000, and one for Charles Meder on Woods street, between Seventeenth and Eighteenth streets, costing \$1,200. Holliday & Son did the mill work on all three.

James T. Gray has completed a two-story frame house at Echo Point, costing \$2,000, for Charles Prager. Mr. Gray also has the contract for a \$1,200 dwelling for William Laughlin at the head of Twelfth street.

Hugh Hawkins is building a \$3,000 frame house on North Huron street, Island, for M. Loftus. He also has the contract for a \$3,500 two-story frame dwelling on North Front street for Percy Beaumont. The latter will be quite an elaborate little house. J. A. Holliday & Son have the mill work on both.

Hess & McMullen have finished a \$2,000 two-story frame house for John Beltz at Echo Point. The contractors have had very bad luck with this house. The first one was about completed when it took fire and was destroyed, there being no insurance. Messrs. Hess & McMullen are also building a two-story six-room frame house for Peter Wendel at the corner of Twenty-third and Water streets, to cost \$1,800.

Edward Hann is building a \$1,000 two-story frame dwelling for August Kirkgeesner on McCulloch street. He has also just completed a very neat cottage for Anton Reymann on the old Lewis Baker place at Elm Grove. This cottage is the first of a number that Mr. Reymann proposes to build for sale and rent at the same place. The cottages will cost about \$3,000 each and are made from very neat plans. Mr. Hann has also finished a \$4,500 job of improvement at Wheeling Park, including a new pavilion and restaurant.

Louis Hartong has the contract for a \$2,000 two-story brick dwelling for Owen Friery on Market street between Twenty-third and Twenty-fourth. J. A. Holliday & Son have the mill work.

Benjamin Imhoff has the contract for building three new houses for Frederick Schwertfeger on Zane street, Island. The houses are to be alike and the three will cost \$6,000. They will be quite ornamental.

Murray Bros., who are building the new county jail, are getting along nicely with the work and the building is beginning to assume shape. Mr. M. F. Giesey is the architect of the job and the mill work has been let to J. A. Holliday & Son.

Frederick Meyers is building a two-story frame house for John Owens on South Jacob street to cost \$1,500.

Kratz Bros. are building three dwellings in one house for August Marchner on South Jacob street. The house is estimated to cost \$4,000. J. A. Holliday & Son have the mill work.

## NEW PLANING MILL.

J. A. Holliday & Son's planing mill on Thirty-first street will be one of the most complete structures of its kind anywhere. The front and rear will be almost entirely of glass and there will be an abundance of light and air on all the floors. Dust collectors will take up the shavings and dust on all the floors and put it in a room near the steam boilers, where it will be disposed of in the furnace. A heavy freight elevator will be a part of the equipment, and the three stories will be filled with modern and first class machinery. Mr. Charles Hamilton is the architect, and the Messrs. Holliday are doing the work with men hired by the day.

E. M. Pearson has prepared plans for a very elaborate house to be entirely after his own ideas, on the National road near Greenwood cemetery. The house will cost about \$7,000 and will be quite an original and interesting structure. J. A. Holliday & Son will furnish the mill work and lumber.

J. H. Wilson, of Elm Grove, is building a two story frame dwelling for himself at that place. J. A. Holliday & Son are furnishing the materials.

Giesey Bros. have the contract for building a row of three houses for John Diehl, at the corner of Market and Ninth streets. Mr. James Giesey, of the firm, furnished the plans and J. A. Holliday & Son will do the mill work and furnish the lumber. The three buildings will cost about \$5,000.

Kargus Brothers are building a fine new frame house at the corner of Twenty-eighth and Chapline streets.

The addition to the Reymann brewery is nearing completion and will be a handsome four-story structure. It will be used for storage purposes principally, and two rooms will be used as a library and meeting place for the employees of company.

J. J. Boyd will build a fine, substantial pressed brick dwelling at the corner of Twenty-second and Chapline streets, the site of the Wheeling Electrical Company's plant. The plans were prepared by Joseph Leiner, and contemplate a very substantial, imposing building, with no "gingerbread" and very little

superfluous adornment. The house is estimated to cost \$8,000.

## A NOTABLE STRUCTURE.

Among the really notable buildings now erecting in the city is the James L. Hawley building at the corner of Sixteenth and Main streets. The foundations are the most massive ever built for any house in the city. Mr. Hawley has kept inquisitive people guessing for several months as to what he intended to do. When the foundations were commenced last fall, the walls and piers were so heavy that many people at once connected them with the very airy scheme to build a terminal railway across the island, and some could even imagine, they say, iron girders lying upon the walls and trains about to enter a depot. Mr. Hawley knew what he was about, however, and he and his architect, Mr. Millard F. Giesey, have the plans laid for an immense building, larger and more substantial than anything heretofore planned in Wheeling. The stone walls are thirty-six inches thick and at distances of twenty-two feet, immense stone piers have been built in the walls to support columns and pillars. For the present a two-story brick building will be erected, with nine store rooms on the first floor. The brick walls for the south and Market street lines are twenty-eight inches thick, sufficient to support an eight-story building. The roof will be built so that it can be carried up with the building when it is decided to continue up to the height provided for in the plans. The foundations are now completed and several feet of the brick wall has been built. The Main and Tenth street sides of the two-story building will be of iron and plate glass. The foundations alone have cost over \$8,000, and the two stories will have cost \$20,000 when completed.

Geo. E. Stifel & Co.'s granite front dry goods palace has been described and written about so often as the work progressed that a further description at this time seems superfluous. Suffice it to say that it is to-day the most elaborate and elegantly finished mercantile building in the State. It is nearing completion, and the owners hope to occupy it by September 1 at the latest.

The Klieves-Kraft Co. is building an addition to Sebastian Welty's residence in North Wheeling, the probable cost of which will be about \$2,500. Among the other work this company has on hands or has just completed is the following:

A six-room frame house for L. Laupp on North Front street, Island, cost, \$2,500; a two-story frame house for Jacob Reitz in the Eighth ward, cost, \$1,300; a two-story frame house for Philip Muhlmann to cost \$2,300; an addition to the residence of Harry Sweeney on Zane street, Island, to cost \$2,700; a new house for Fred Happy on Fifteenth street to cost about \$4,000; a modern plate glass front for Henry Bieberon's restaurant on South street; a handsome new residence in Washington, Pa.; extensive improvements on the residence of Frank J. Hearne, out the National road; a water tower for the Bloch Tobacco Company, 100 feet high, 34 feet square at base and ten feet square at top; an addition to the North Wheeling Hospital, to cost \$10,000; carpenter and mill work for the City Bank building. The Klieves-Kraft Company has also furnished the lumber and mill work for ten other houses not mentioned here, and built by local contractors.

## ANOTHER NEW BANK.

M. F. Giesey has prepared plans for a new stone front for the building of the Bank of Wheeling. It will include big plate glass windows and an entire set of new internal fixtures. The improvement is estimated to cost about \$8,000.

Mr. Giesey has also made plans for the following work completed this season or now under way: An addition to the residence of Ferdinand Reinhart on Seventeenth street, to cost about \$1,800, contract let to William Friese; a double frame house for Peter Grier on North Market street to cost \$3,000; a new bank building for Earl W. Oglebay at Bridgeport, to be occupied by the new Bridgeport bank, cost about \$5,500; a three-story brick building for Furbee & Sons, Manington, cost about \$5,000; a new building for the State Reform School at Pruntytown; a young people's temple at the Moundsville camp ground, to cost \$2,000; two brick houses for J. C. McCrum on Fourteenth street, cost \$6,000, contract not let; a residence for V. S. Weaver at Moundsville, estimated to cost \$3,000, contract not let; an addition to the Bridgeport public school, to cost about \$4,000, contract not let; alterations to the Odd Fellows' Hall Association building on Twelfth street, to cost about \$25,000; a residence for E. C. Ewing at Leatherwood, to cost \$3,000; an addition to the residence of John S. Naylor, at the corner of Penn and Virginia street, Island, to cost \$4,000; an addition to the residence of Albert Beltz, on Sixteenth street, to cost \$2,000, contract let to Butts & Britt and Beltz, Flading & Co.; remodeling residence of Samuel Henderson, on North Main street, to cost \$2,500, contract let to Beltz, Flading & Co.; residence for Mrs. Frances Archibald, on South Jacob street, to cost \$2,500; two houses for David Garden, on North Main street, to cost \$2,000; an addition to the residence of Robert Clark, on South Chapline street, to cost \$700; Mutual Savings Bank building, erected by Beltz, Flading & Co., for \$8,000; four tenements in one house for Mrs. Boreman, corner Fourteenth and Chapline streets, built by Beltz, Flading & Co. for \$10,000; a three story brick and stone store building for L. Boneberger to cost \$6,000, contract let to Beltz, Flading & Co., T. W. Jackson and Francis Ferguson; new fronts for three four story buildings on Main street, occupied by Frew & Bertschy, Arbenz & Co. and M. J. O'Kane, to cost \$7,000, contract let to Beltz, Flading & Co.; new front in Gutman's store, corner Twelfth and Main streets, cost \$3,000, just finished by Beltz, Flading & Co.; residence for Mrs. Mary C. Norton at Pleasant Valley, just finished by Beltz, Flading & Co. at a cost of \$5,000; glass factory for Buena Vista Glass Co., at Buena Vista, Va.; double frame house for A. G. Wincher on the Island, to cost \$4,000, contract let to Beltz, Flading & Co.; residence for H. P. McGregor on South Front street, Island, to cost \$1,000, contract not let; residence for Charles Grimm, to cost \$1,800, Irwin Imhoff, contractor; residence for Alfred Davis at Pleasant Valley, to cost \$2,500, contract not let; residence for M. F. Hamilton at Manington, to cost \$4,000; residence for John Blackshire at Manington, to cost \$4,500.

Beltz, Flading & Co. have finished the following jobs since the season opened: \$14,000 frame dwelling for Jacob W. Grubb at Echo Point; \$10,000 residence for F. H. Lange at Fourteenth and Eoff streets; new open store front for Miss E. Rody, costing \$900; new four-story business house for J. T. Goodwin & Co. on Main street at a cost of \$7,000; remodeling John McAdams's house on Sixteenth street, cost \$1,000; new double frame dwellings for Mrs. Isaiah Warren on Fifteenth street, cost \$4,000; new open front for George Hibberd & Son, cost \$400; two-story brick dwelling for William Cobach on McCulloch street, cost \$1,500; remodeling

Henry Kell's house on Sixteenth street, cost \$500; remodeling William F. Grabe's house on South Jacob street, cost \$500.

B. Exley & Co., of Martin's Ferry, are building a ten room house for Ernest Smith in the Eighth ward.

Besides all these houses, the elegant brown stone residence which Mr. A. Keymann is building on the corner of Eoff and Fifteenth streets must not be forgotten. It will be the handsomest house in town, and will cost about \$75,000.

## RED RIVER OVERFLOW.

A Higher Rise than that of 1867—Finding Dead Bodies.

GAINESVILLE, Tex., June 11.—The rise in the Red river is unprecedented, exceeding by far in volume the great flood of 1867. At Warren's and Civil's Bend, twenty miles north of here, the destruction is widespread. In these two bends there were ten thousand acres of corn, cotton and small grain, cultivated by some fifty families. All these crops are destroyed, most of the houses swept away and large numbers of cattle, hogs and chickens drowned.

Near Leon, I. T., thirty miles from here, on Red river, the dead bodies of a man, woman and little babe were found in a drift, they having been drowned during the late overflow. The bodies have not been identified.

William Lynn, a farmer living north of here, on Hickey creek, was drowned in that stream yesterday while trying to ford it.

The first trial of Dr. Wood's Norway Pine Syrup will satisfy any one that the lung-healing virtue of the pine tree has now been refined into an effective and convenient cough medicine. Sold by all dealers on a guarantee of satisfaction.

NEW

Is a concentrated extract of Sarsaparilla, Yellow Dock, Pipsissewa, Juniper Berries, Mandrake, Dandelion, and other valuable vegetable remedies, every ingredient being strictly pure, and the best of its kind it is possible to buy.

It is prepared by thoroughly competent pharmacists, in the most careful manner, by a peculiar Combination, Proportion and Process, giving to it curative power

It will cure, when in the power of medicine, Scrofula, Salt Rheum, Blood Poisoning, Cancerous and all other Humors, Malaria, Dyspepsia, Biliousness, Sick Headache, Catarrh, Rheumatism, and all difficulties with the Liver and Kidneys. It overcomes That Tired Feeling, Creates an Appetite, and gives great mental, nerve, bodily, and digestive strength.

Hood's Sarsaparilla is sold by all druggists. \$1; six for \$5. Prepared only by C. I. Hood & Co., Apothecaries, Lowell, Mass. N. B. If you decide to take Hood's Sarsaparilla do not be induced to buy any other.
